# Mid/Central Florida Corridor Coalition

February 10, 2021

# What is TSMO?

- Transportation Systems Management and Operations (TSMO)
- Maximize efficiency of existing network
  - Incident management
  - Signal coordination
  - Work zone management
  - Special event management
  - Weather management
- Internal culture – consider ways to manage the systems to resolve problems

# Purpose of the Coalition

- Recognize the importance of the I-4 Corridor
  - We are all impacted by the functionality of the corridor
- Focus on TSMO strategies
  - Share information, data and lessons learned
- Maintain agency autonomy
- Formalize coordination
- MetroPlan Orlando to lead; received a state grant to help fund group's activities (\$100,000)

## Coalition Goals

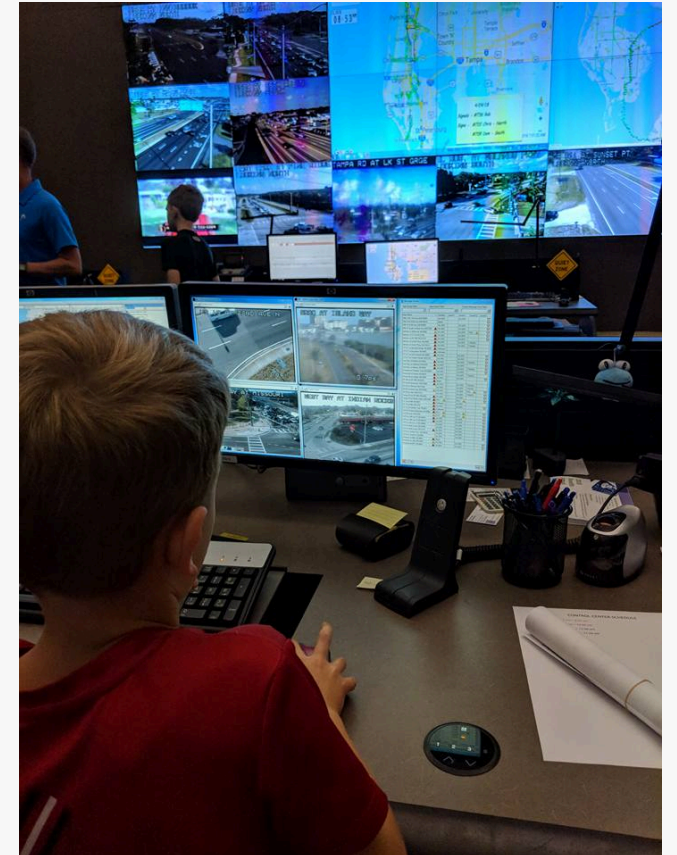

- Coordinate and support multijurisdictional collaboration, planning and research
- Work with the other M/TPOs in Central Florida to enhance the roles of TSMO in meeting mobility demands and safety concerns
- Assist each other as needed to cultivate a culture for TSMO at each MPO
- Showcase the benefits of exercising TSMO in a mega-region
- Utilize lessons learned from other Corridor Coalitions

# Next Steps

- Each MPO to sign final MOU
- Finalize the goals and objectives
  - Need to identify a way to address equity in the implementation of transformative technologies
- Begin Implementation with the establishment of a working group
- Regular updates to the MPOs and regional entities

Today: Authorize Executive Director to sign MOU
